

Putting an animation into a button

Goal: make a button's rollover state animated

1. Make an animation in a movie clip (see related tutorial)

2. Copy the first frame of the movie clip.
3. Create a new button
4. Paste the first frame of the movie clip into the "Up" frame of the button

5. Click into the "Over" frame, and insert a keyframe.
6. Delete the graphic from the frame.
7. Drag the animated movie clip onto the stage

8. Click into the "Down" frame, add a keyframe

more...

9. Click the “Scene1” link in the upper-left hand corner of the screen

10. From the library, drag the button onto the screen.
11. Click ctrl+return to test the movie.
